

HOUSE STYLE

One system for everything Magnum AI publishes. Anything built from here uses these values, unchanged.

[← BACK TO THE MEMBERS AREA](#)

PALETTE

Eleven values. Coral is the only accent, in three strengths. Navy carries the weight. Slate is the quiet second colour and never carries text.

PAPER #FBFBF9 Page ground. Warm off-white, flat, no texture.	WHITE #FFFFFF Cards and panels. Two-pixel ink border, no shadow.	NAVY #1F2A37 The masthead band, footers, figure plates, cover slides, dark cards. Where the weight is.	INK #1E1B17 Text, borders, headings.
CORAL #DE4A3C The accent. One word in a heading, labels, links, numbers. Anything you read.	CORAL BRIGHT #FF6F5E Fills only. Badges, bars, the stripe in a figure, the rule under the band. Never small text on white.	CORAL TINT #FBE1D8 Tags, marks, highlighted lines. The pale wash.	SLATE #5B6B7A Ticks, secondary lines, figure detail. The quiet second colour.
BODY #2B2823 Running text on paper.	CHAR #3A3630 Text inside cards and panels.	MUTE #7A7A7A Section notes and secondary lines.	

TYPE

Three faces, each with one job. Never introduce a fourth.

OSWALD — DISPLAY

MAKE CLAUDE YOURS.

600 or 700. Uppercase. Line height .90 to 1.12. Headings and card titles only.

IBM PLEX SANS — BODY

Each issue takes one idea, shows what it changes in practice, and hands you the prompts to use it straight away.

400 for running text, 500 or 600 for emphasis. 15.5px in cards, 17px on the page.

IBM PLEX MONO — LABELS

SESSION DECK · NINETY MINUTES

11px to 12px. Uppercase. Letter spacing .14em to .28em. Labels, dates, metadata, footers.

THE CARD

One component does most of the work. White, two-pixel ink border, no shadow, no rounded corners. On hover the border turns coral.

23 AUGUST 2026

CARD TITLE IN OSWALD

MONO LABEL · SECONDARY

Body copy sits in IBM Plex Sans at 15.5 pixels. Cards in one section are always the same type: all with images, or all without.

RULES

NEVER MIX CARD TYPES

THIS IS THE ONE THAT BREAKS PAGES

A tall image card beside a short text card leaves a hole and reads as a bug. Put the archive link under the grid as text, not inside it as a card.

UNDERSTOOD →

RULES

- **Coral is the only accent.** Deep coral for anything you read. Bright coral for fills on navy and badges, never small text on white. The tint for tags. Rust, beige, black and gold are retired.
- **Slate never carries text.** It exists for ticks, secondary lines and figure detail.
- **Uppercase Oswald for every heading.** Sentence case display type belongs to a different brand.
- **Every label is mono, uppercase, letter spaced,** with a rule running off to the right.
- **Flat. No shadows, no blur, no radius.** Structure comes from the ink border, the navy blocks and thin rules. Offset shadows and rounded corners are previous systems.
- **The ground is flat.** Off-white, no texture. Weight comes from navy, not from pattern.
- **Cards within a section share one type.** All image, or all text.
- **Never ship a placeholder card.** An empty section is better than advertising an empty room.

- Introduce a fourth typeface, or Playfair, Bebas Neue, Archivo Narrow or Inter. Those came from documents that predate this system.
- Use black and gold. Retired.
- Restyle a document a client has already received. Deliverables stay as they were sent.
- Change a URL that has been sent to a client, for any reason, including a redesign.

COPY THE TOKENS

Paste this block at the top of any new page. Every value on this page comes from it.

```

WHERE THIS APPLIES

Live in this system: the members area, the Field Note archive, both Field Note issues, the Make Claude Yours deck, and every social thumbnail.

Still on older looks, in this order of priority: the Fine-Tune manual, the Manus manual, and the weekly newsletter masthead in the magnum-newsletter repository. Newsletter issues already sent keep the look they were sent in.

Deliberately left alone: the Louise Kearns guide, the BA Growth guide, and the GIG and Easy Fit documents. Already delivered.
